

# LOW COST A1c TESTING

\$15

[WWW.DIABETESDAYTON.ORG](http://WWW.DIABETESDAYTON.ORG)

The A1c test result reflects your average blood sugar level for the past two to three months. The higher your A1c level, the poorer your blood sugar control. And if you have previously diagnosed diabetes, the higher the A1c level, the higher your risk of diabetes complications.

***We'll be offering a low cost A1c test by appointment only, on the first Wednesday of each month beginning in April.***
