

Until there's a *cure*, we help you *live*

Our Mission...

Diabetes Dayton is dedicated to the assistance and support of individuals affected by diabetes.

Diabetes Association Dayton Area DBA:

Diabetes
Dayton

Local Agency Serving Local Needs

MESSAGE TO THE COMMUNITY

2009 was a challenging year for both businesses and individuals in the Miami Valley. We had many businesses closing, relocating or laying off and like many non-profits, we felt its impact. Additionally, new data from the Public Health Department reflected that the diabetes incidence in Montgomery County's is now at 13.1%, making it higher than both the state and National averages. As a result, we saw increases in the numbers of requests for free diabetes supplies as well as for our free diabetes educational classes. Without insurance, people quickly discover how expensive managing this disease can be. Unfortunately and because of this, many people stop managing properly, which is exactly what we hope to avoid. Our programs allow people living with diabetes the ability to access supplies such as test strips and syringes as well as vital information taught in our educational classes on how to prevent those long term complications.

We held a successful Expo, which occurred on World Diabetes Day and had over 600 people attending and participating in free screenings and educational seminars. We initiated a second camp, both of which offered children living with diabetes the opportunity to meet other children like themselves and learn how to manage their disease effectively. We provided hundreds of people the resource referral they needed, be it educational materials, pharmaceutical assistance or the opportunity to connect and benefit from a diabetes support group.

Since 1963, The Diabetes Association of the Dayton Area, a local independent diabetes association, has been serving this community. We are dedicated to working hard at honoring our mission of 'providing assistance and support to individuals affected by diabetes,' continually striving to improve our offerings. Special recognition and thanks to our Board, the United Way, the Combined Charitable Campaign and all of our many generous and wonderful supporters, who make our programs and services possible.

Ron Nischwitz, President of the Board 2009

2009 HIGHLIGHTS

Camps for Kids

Due to the generosity of funders such as the Harmony Program of The Dayton Foundation, The Royal and Select Masons, The F.O.E., The Bundschuh Foundation, and many other generous contributors we were able to hold the 46th Camp Ko-Man-She residential summer camp for children living with Type 1 diabetes.

Additionally, in 2009, we were awarded grants from the Foundations of CareSource and the Levin Family, which allowed us to initiate a new camp geared specifically for children who are at risk for or have been diagnosed with Type 2 Diabetes (often referred to as 'adult-onset diabetes' and unheard of in children, but sadly, a growing problem). Our new camp, Camp Tiponi, which is Native American for 'Child of Importance' allowed these children to come together for the fun experiences of summer camp, the opportunity to meet other children dealing with issues like themselves and the venue to learn how to make healthy lifestyle choices that they can continue back at home. The camp was very well received, with every child attending losing weight and parents and campers alike reporting in after camp evaluations that they are indeed adopting healthier lifestyles.

We partner with Dayton Children's Medical Center for both camps, who assists us with a wonderful staff of doctors, nurses and dietitians. This allows us to provide a medically safe camping experience and we are extremely appreciative of their support.

Diabetes Emergency Supply Assistance Program (DESAP)

We assisted more than 500 uninsured with diabetes supplies. Glucometers, test strips, syringes, lancets, sharps containers, insulin referral and on-going patient assistance are readily available for those most in need. This remains one of our most utilized services, especially in light of the continued economic decline and many in our community losing insurance benefits. Our program ensures that people living with diabetes continue to monitor their blood sugars and receive their necessary medications, helping them to avoid long-term complications and possible hospitalizations.

Diabetes Education Classes

We provided free classes to more than 300 individuals. These classes are taught by a Nurse Practitioner and a Registered Dietician, both of whom are Certified Diabetes Educators. Classes are quite comprehensive in what they cover. Many people living with diabetes can not afford or do not have the proper coverage to pay for the billed diabetes education. Like our DESAP, our educational classes offers those living with diabetes the information and skills necessary to manage their diabetes effectively.

Detection and Prevention Screenings

We reached out to over 1,100 individuals with diabetes screenings at community based events, including local health fairs, festivals, and worksite programs. With over 57 million Americans living with prediabetes; early detection is vital to prevention.

Diabetes Expo

Our 18th Annual Diabetes Expo was held on World Diabetes Day in November (Diabetes Awareness Month), featuring over 35 vendors, 4 speakers addressing diabetes topics and various health screenings. Our event has grown into the largest event of its kind in SW Ohio.

Activate Ohio

An ongoing initiative partnered with YMCA's of Huber Heights and Englewood to offer a 10 week diabetes education program that addressed how to prevent the onset of Type 2 diabetes as well as how to manage diabetes after diagnoses.

Our programs and services continue to remain successful and produce positive results.

2009 HONOR ROLL OF DONORS

Diabetes Dayton is fortunate to have many friends who help support our great programs and services. We are grateful for every gift, but due to space limitations, we are only able to acknowledge donors who have contributed \$200 or more in the past year.

United Way

Special recognition goes to all the individuals who, during this past year, designated through United Way, their dollars to the agency. It is through your generous support we are able to maintain excellence in our programs and services.

Thank You

As with every successful organization, people are the most important ingredient. Therefore, we would like to thank the Board of Trustees, our Diabetes Dayton staff, and our wonderful volunteers.

It is because of the support of these dedicated individuals that Diabetes Dayton is able to successfully carry out its mission.
